

Adaptive Paths for Language Learning

Marco Loche,
Technical Manager
[marco.loche@capturator.com]

LangTech 2008

San Michele a Ripa

Rome - Italy

Capturator.com

Knowledge, contents and technologies for language learning

- Capturator.com
 - Founded in 2000 as a spin-off of Communications Company
 - Provides language services, contents and technologies.
- Customers
 - Major companies, Universities, International Organizations.
- Awards
 - 2005 and 2006 eContent Award on the e-learning category.

Products Services and Technologies

– Products and services

- 18 highly interactive language courses in 6 languages
- Extensively experimented language testing materials
- Consultancy services for language e-learning projects

– Technologies developed

- Unique authorware for the production of Language L0s with rich multimedia and interactive features
- Adaptive testing technologies for the production of reliable and diversified testing materials
- Content licensing system for remote installation

Future developments

1. A centralized system for remote retrieval of learners' data and results for :
 - a) an ongoing assessment of learning contents
 - b) the provision of learning contents adapted to the individual learner's needs
2. The integration of voice recognition technologies for the perfection of pronunciation.

We want to *expand* our activity.

Technological partners :

for voice recognition technologies.

Commercial partners:

for the marketing of products and services nationally and internationally.

Financial Partners :

for participating in our company.

Thank you !
